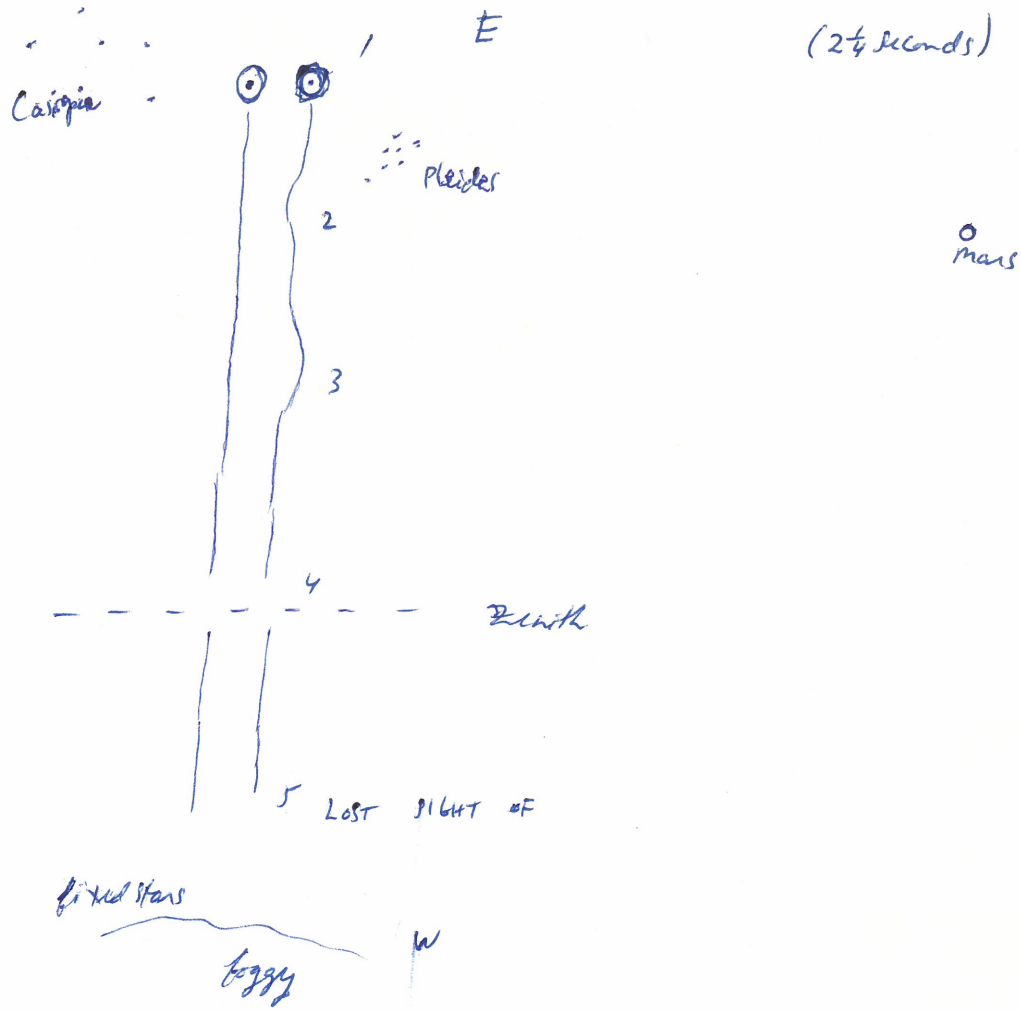
Note: recognized objects at once + pointed out, afterwards; large less experienced obs would not note same (as many) details.

4/11/75

21^{00}

(2¼ seconds)



(First clear night in many days, watching stars on altar, neighbor visiting there too.)

1 - Closer than 10/10, farther away than 2/10, two bright fuzzy-edged parallel white lights appear travelling relatively fast. A dome of white light on each side of elliptical-type circle, and a small black center. Enlarged.

2 - 3 movement slightly
