

16/8/76
9:55 p.m.

(Very clear night, see zodiac arms clearly + deep, out 5-10 minutes on alien looking star, expecting to see UFO but not looking just empty mind, surprised at first but sure by step 2 + afterwards due to speed, type of light, + proximity, but lacking feeling of shock in spine)

- 1- Very bright white light appears in movement with dark center, silent, 5x a jets speed, 10-15x an airplane's
- 2- When overhead can see details, that it's actually 2 grey oblong objects, each surrounded by bright white energy field, a bridge of white light connecting them + as if in constant movement (touching all the time), flying completely parallel.
