

- 1 - On altar looking at star, very bright white light begins flashing, silent, distance implies movement between plates rather than a <sup>cont.</sup> straight-line movement, meaning must be constant cut-offs, 3-4 times larger than stars.
- 2 - Periods of flashing, to set the same, pauses between sets, called loudly for Denier who witnessed after step 3
- 3 - Flashes bright enough that completely visible thru clouds thick enough to hide the star - implies object flying low
- 4 - Set #
