

A Channel of Codes

A man from a UFO plane-of-origin comes to me. He's about 3½ feet tall, around 60, his head is constantly tilted about 40 degrees on his body, and he speaks with a wry, wise, friendly smile. He says, "We're going to give you some information codes", and he shows me 4 lines of 4 number digits on top of each other, which progress from left to right and lead to the next line (as a simplified start suitable for my level of mentality). I imagine an inner picture of a nearby blue sky with a few white clouds and a man-made copy of a UFO floating there, and say, "But humans here are already trying to copy UFOs." He reassures me, "We know, but they only have access to some physical codes. I'm giving you consciousness/non-physical/spiritual codes (as components of the UFOs and their usage)."
