### A free choice

(Dreamed briefly but identically twice, which is the signal that i should get up and record it, to get the freshly recalled details.)

I could choose between being shown more info from any one of the 5-6 lanes, where there were variously shaped UFOs or parts of their propulsion devices. Two contained UFO-shapes I've often seen, two had varieties of the thin top outer column I've often seen, and two had other subjects. I was most curious about the longest blackish column (the rest of the craft was not shown).

Switch to a planet where that comes from. The atmosphere here uses mild orange light and its sky is black. Its surface fundament is solid, and I was shown a semi-arid, cool, temperate zone of its biosphere. There was some vegetation, green bush-like plants, and tall brown stems of tree-like plants.

A representative "queen" of the tall, human-like beings who live there (i mentally called them "banana people") stood in her formal attire, looking at me with a facial expression which can't be interpreted by our Earth-standards, due to its different biology. Her head had other proportions: She had a long head, its contours differently shaped than ours, two vertically-formed eyes, lips, no external ears, no obvious protuberant nose (but possible nostril holes), long black hanging curled hair-locks, and the central hair-covered top portion of her skull protruded far up from the rest of the skull, and was rounded on top. She had shoulders and two arms, and a long but unseen body.
