UFO dreams

(I have read intensely about UFOs within past days, and wished to renew my telepathic or other contact w. them)

A little white UFO built for 1, but 2-3 could be cramped into it, in which I was trying to teach N. to fly, from inside it.

30.12.92

We were 6-7 students, ^{young} people, learning from an extraterrestrial how to fly passengers, and I fly an UFO.

There were cot-benches in the walls for 6, as ~~the~~ trips could take several days (which impressed me). Much more so

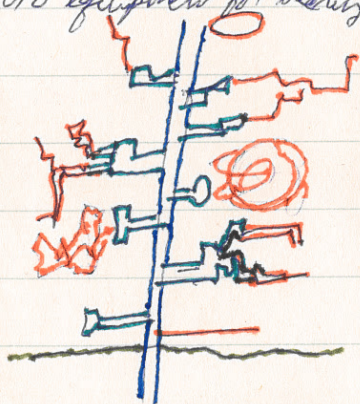

6 benches

6 benches where we could sleep or sit on the 3-person bench on each side, to watch

this dream at before. We had 2 instructors in space uniforms, one did most of the talking. We were from different nations, and both sexes.

The UFO equipment for steering, and the routes away involved (the channels), branch off

my spinal cord
my spinal cord

of my own spine; i.e. the UFO is flying from within my own body. (This was a feeling from within ~~my~~ body) It felt like a corridor w. its poss. exits, most branching out into brown/orange space-maps, leading to various space-realms, worlds.

(In connection to this was a very important insight-dream, which I didn't need to re-remember.)
