UFO close-up (to a crowd)

steady speed

coming very slowly over the large crowd

turning more towards the base

+fuzzy-contoured circle shape

very slowly + graceful

horizon

+all sorts of movements, instant disappearance, etc.
showing all the UFO phenomena, like in a circus

A man gives an outdoor lecture to ~~~ towards seated on white stone steps, with a 16" movie about UFOs. Then I keep looking, and sure enough one comes from the distance, broad daylight; I say "Look one is coming now! But keep quiet and keep sitting" (as I stand directly). As it flies slowly overhead, bigger than the ever seen in the air, a woman behind me keeps talking, and I shout 'Shut up, woman!', thereby losing some of the peace I observe with.

(Upon drawing it, I'm struck by resemblance to Full Lotus position + feel dream rep. ~ more minor-image of good mood, than UFOs. Felt so heavy to record it.)
