UFO close-up (to a crowd)

A man gives an outdoor lecture about UFOs to thousands seated on white stone steps, playing a 16mm movie's film recordings. It shows a bright white-light colored bell-like shape, tilted at a sideways angle. As it flies, it turns more toward its base, which now looks like a circle of bright white-light with fuzzy contours. Like to the entranced audience in a circus, it demonstrates all sorts of movements, instant disappearance, etc., all the typically UFO visual phenomena.

Then I keep looking upwards, and sure enough one comes in from the distant sky in broad daylight. I stand up and loudly say, "Look, one's coming now! But keep quiet and keep sitting." It starts at a far distance, goes behind a cloud, and flying at a steady speed, continues very slowly in a curved path toward the large crowd. It's got the same bell-like shape, but the details of its sections and colors are much more defined. As it flies directly overhead, closer and bigger than I've ever seen in the air, a woman behind me keeps talking, and I shout to her, "Shut up, woman", thereby losing some of the peace I'm observing with. It continues very slowly and gracefully, and flies into the horizon.
