

## UFO dreams Sept. 2023

12.9.23

### "Disclosure"

A "Disclosure" man with a friendly, squarish face, surrounded by soft-white (ufo-ish) light, smiling softly to me, telepathically saying "Disclosure".

13.9.23

### White materialized energy - a flight demonstration

Everything is white (ufo-ish) energy: the Earth, objects, me the viewer, etc., but their contours are a likewise white materialized layer. There was a loosely spherical or squarelike small area of white light (a materialized object) which flew up from the curved surface of the Earth, not far from my viewing point, flying in various directions: in a square, back and forth in straight lines, and in more curved lines, all at a speed suitable for my visually registering it, with occasional small pauses at the end of a flight line.

16.9.23

### a UFO's birth

There are dots of material suspended through soft white space. These can be combined by a strong conscious wish for them to combine into the straight lines of a geometrical outlined shape, which then gets filled in by shaped physical particles to become: a UFO with rounded shape and real contents in the field of soft white space.

22.9.23

### Discreet Shut-down Stations

Within (ufo-ish) white atmospheric space around the Earth are lots of weather satellites, corporation satellites, national satellites with weapons, etc. A grey elongated craft with rounded ends with a dot like a sensor or portal at each end, floats among them to monitor all the satellites' systems. I suppose there are many of these crafts stationed around the planet. It might be a UFO, prepared to short-circuit parts of the system, if for example, satellites have begun the count-down to an atomic warfare attack, or the craft might be national (for example Israeli), to be used to shut down parts of the enemies' systems, as an early stage of warfare.
