

10 Sept. 1983

a UFO radio broadcast

Sent throughout the USA:

"On the radio today, we received this message, and astronomers reported that at the same time over the canyons, valleys, and plains of several larger Western states, so-called UFOs appeared high up, but visible by eyesight - even with their doors open, and outside each, in formation, was the number of smaller craft which they contained. Their leader was a single one-manned UFO, relaying this message:

"All people, please hear. There are (ca. 3 X ?) number of atomic-driven vessels today - and the USA has (X) number of Ballistic Missiles, Great Britain (? number), France (? number), and the Soviet Union (? number)..."

The broadcast continues, implying "and we UFOs have far the majority of such vessels..."

The speech will continue, but I awake, thinking that their lesson might be -

- a) see us, we're here, you already believe in our proof of this
- b) big international war would make no sense, because we have more power than all of you put together
- c) now listen to us, ... (the continued speech)
