Clarifying master-dream about my UFO reports

Dream: An enormous system behind my writing up the experiences and insights of my 17+ UFO reports. A great intuited but unseen depth in their details, relations, logic, repercussions about reality - in the spaces not yet filled in within the reports and their systematic connections. Awe at the intellectual strength which I already have through them, but am yet to discover and express. Such a system worthy of a philosophy-king must be fueled from outside me as I am. Like viewing the unseen logic in the arrangement of a section of a bee-hive.

Thoughts about the dream-revelation:

While asleep, it became clear to me that all the 17 written UFO reports I've made, drawn, and am further analyzing are being informed by an unusual clarity, stamina, and overview of both each report's sections, the reports' inter-relations, the combined reports' overall system, and an almost mathematical logic reaching behind that - into one coherent whole of a different order of magnitude than I can usually grasp or present.

It occurs to me that these skills, plus the degree of details and their relations, both as recorded and yet to be discovered, may have been imprinted in me during the periods in late-Jan. through early Feb., 1976, when I was openly receiving the long and speedy stream of signals sent toward me through their directed light-beams and later 8-boxed antenna, especially while I watched them at the end through binoculars, but also as I picked them up unconsciously by staring with the naked eye at their combined light, which might have contained such precise signals, but which seemed undifferentiated in my conscious vision and awareness.

The info imparted in my successive UFO sightings was likewise systematic, leading me on step by step to both understanding and direct experiences in the areas which had my main interest of those being shown or offered to me.

So, their having early-on registered my interest in them, and that i recognized their superior technology and peacefulness - their then telepathically having checked out my conscious mind's contents during an observed long meditation on my outdoor terrace, during my unwitting short emotional outbursts about them during actual sightings, and elsewhere - they perhaps deemed me a good Earth ally, especially as they must have picked up that i originate from other planets prior to this life, and historically during this life have been consciously aware of other planes of existence.

So they filled out my mind, when I was willing to receive information, and perhaps injected info which would ripen my mind, and aid my mental development, when I became ready for it. My having recently given up the sexual outlet and renounced focusing on partner-dynamics or a search for a new partner, and renounced substitute-living through daydreams, but instead looking for social, Nature-based, and internal bodily, satisfaction and growth - as well as daily spiritual practice and courageous changing of psychological patterns, has made me now ready for that speeded-up development.
