

"Flying saucer telepathy dream continued" (B)

Describing: 1. The phenomena they create

2. Their own appearance

3. Their technological functioning (part of a continued correlating with the details seen, and explanations of them given in earlier dreams)

4. Their purpose toward mankind, which is here

a) To establish their identity, and that they exist, thereby overcoming our fear,

b) To demonstrate that they have collected information about us,

c) As suggesting leaders, to evidently continue to show us what we should do in this (our) time of crises.

Factors in the dream:

a) From my earlier waking UFO sightings, i recognized the secondary phenomena first, then traced them back to their source, the creating device.

b) Children saw the two objects first, and were the most receptive and relaxed people around the phenomena.

c) My job was (will be) to be a discoverer-explorer, a coordinator of information, a communicator of the meaning of events which are taking place (which they choose to take place).

As an example here, by keeping the merely curious and insensitive persons who would dissect/touch the object, at a distance.

d) The small light at the end of a thin funnel on the UFO's shape-changing body, is used for communicating in ways we understand.

While orange, it created a stomach-ache/feeling of bodily sickness aversion in us, through the negativization of energy, to warn us to keep at a distance, not try to touch it, etc.

Its funnel was later used to eject a thick liquid, which became a film for us to watch.

e) The film showed: a man getting his throat cut during war; newspaper headlines re-assembled in space plus another mass-media; a moving street-scene from one of our large cities with many men hurrying alone (distracted, desperate, "run-down").

I woke up in the midst of this communication because I could personally "hold/take" no more information.

Immediate thoughts:

g) Had the strong suspicion that this dream was sent from outside, also to several

more persons than myself. That it can continue, perhaps in an altered form, when i'm ready. That telepathy is more efficient, regarding information and education, than direct UFO sightings.

h) This UFO-research form is probably the best suitable method for me to join the peaceful-evolution movement.
