1983

'flying saucer' telepathy continued

describing 1) phenomena they create

- 2) their own appearance
- 3) their mechanical functioning
- 4) their purpose toward mankind

- I) which is to establish their
own energy on our identity
- II) show they have collected info. about us

[dream broken off]

- III) evidently cont. w. what we should do in this crisis-time
as suggestive leaders

a continued correlation w. details seen earlier
more "hollow" inside

bright (orangeish) yellow (a more orange shade than this)

red/orange light

maybe 30 cm. across

changing form by
unfolding into

olive green body

resembled a 'tank' almost

luminescently
glowing in on
longing light
deep orange/red

(middle bottom energy used in
contact w. earth-gravity - a 'brake')

thick liquid the light used as a liquid projector

becoming film made into any size

- a) recognized secondary phenomena first, tracing them to their source the 'machine'
- b) children saw the two objects first and most receptive, relaxed around phenomena

- c) my job was to discover - explore, coordinator of info., a communicator of meaning of events taking (to take) place
(e.g. to keep the curious & imaginative who would dissect/analyze the object at a distance)
- d) the small light while orange created a stomach-ache/body sickness aversion in us, through negativization of
energy, to warn us to keep a distance, not to try to touch it etc. ;
It funnel later used to erect liquid film for us to watch ; the light is for communicating in ways we understand
- e) the film showed : a man getting throat cut during war
newspaper headlines re-assembled in space + another mass media
a moving street-scene from one of our large cities w. many men hurrying along
(distracted, desperate, run-down)
- f) woke up in midst of communication because could personally hold more info.
'take'
- g) my reception only possible because did not have sexual release - the energy not wasted (cond. is dreamt which
well noted and sexual energy must aroused but not escaping)
- h) the strong suspicion that the dream sent down from outside to several more persons than myself too,
and can continue perhaps in altered form when I ready ; telepathy more efficient info.-educ. than
direct sightings
- i) this Ufo-form probably best suitable method for me to join peace movement
and
other cond. - ...
