the right 2 words

A standing human-like being maybe 4 cm. high with a jagged-edged black body or full body-suit and a pointed black hat or head and hidden face, twice explained to me in simple words that i could just fill out this form rightly (a stiff yellow paper about 12 cm. long x 6 cm. high), if i wanted a UFO to materialize, so that people could see it.

On its one side, the paper had a black-underlined blank section in a short sentence, in which i should write the correct 2 words (which i had to figure out), for a small picture of the UFO to appear on the paper's other side, which would correspond to a real UFO of that shape which would shortly afterwards appear at night, so people could see it from a distance.

.....

(Upon awakening, I felt like a fool for having this dream, until i remembered that taken literally, Steven Greer for example, teaches groups a standardized procedure to get friendly UFOs or extraterrestrial beings to appear. Or else the dream might well be to inspire me to get past the roughly 10-day block i've had about continuing my work on the probably last section of my analyses of my sightings: A list of after-thoughts and unanswered questions about those UFOs' advanced physical, energetic, and consciousness technologies, their own motivations, etc.)
