

Higher-level Implications

My first-hand combined experiences with these UFOs have among other things demonstrated:

1) A many-faceted, practical, advanced technology which requires mastery of more extensive laws of physics, than those humanity has so far based its culture on, 2) that the beings who control these UFOs have acted peacefully, 3) that it's possible to physically and energetically shift between for us visible and invisible layers of reality at will, 4) that the electric 2-way communication of thoughts can be highly developed and precise, 5) that they can initiate and lead an ongoing visual and mental communication with somebody they've selected and present a step-by-step series of tutored lessons.

Humanity now needs to become more aware of these motivations and messages.
