

10/10/75

Ca. 9 PM

- 1 - airplane w. red + white lights travelling slowly
- 2 - moving white light appears <sup>(turned on)</sup> (3x size of stars) (going 1 1/2 times as fast as a jet) (soundless)
- 3 - second white light appears moment later, completely parallel, same speed
- 4 - 1<sup>st</sup> light ~~disappears~~ <sup>disappears</sup> 1/100 of a second, reappears going in ca. 120° direction  
second " not watched further
- 5 - 1<sup>st</sup> light makes abrupt turn (continuous light), realize no known explanation
- 6 - " " turns ca. 90° <sub>sharp</sub>, no visual time-lapse
- 7 - " " turns equally quickly, but now on side ~~it~~ appears <sup>much</sup> larger + disc-like,  
large red light underneath + white light on top; seems long distance because details unclear  
(higher than plane)
- 8 - red + white ~~it~~ disc turns abruptly + appears as white small circle again
- 9 - go in to call for others

total time ca. 5 seconds

VERY PRECISE
