

10/10/75
 ca. 12¹² midnight

- 1- two white circles appear, same size as earlier, time but going faster, parallel movement (A+B) ^{a visual area from outside visual area,}
- 2- B suddenly curves over flight-line of A
- 3- B curves back, A deviates slightly, cont. straight path (sound of train coming through)
- 4- both curve in opp. directions + cross, ~~then curve co-ordinated~~ co-ordinated quick movement, B crosses over in direction first at point C
- 5- cross back as in movement #3
- 6- B curves over and around and back extremely quickly + in short space, ^{from constant} ~~equally fast~~ ^{previous flight speed}
- 7- B+A waves and cross at least once more as in movements #2-3
- 8- follow flight until disappear in horizon + clouds (get smaller)

|| movement remind of fishes playing as swim next to each other, total time ca. 5 seconds
 VERY PRECISE
