

28/12/75

8:30 p.m.

(total ca. 5 seconds)

(Foggy, very dark, out with Nuser, in an empty field, (near large electric pole)

- 1- Out of eye-corer, large orange shape, like glowing or transparent, seen a split second, with "a hole in the semi-circle" either at top side or bottom, gone at once.
- 2- At 100-150 meters, ca. 1 minute later, stars light bright + silent, (like firecracker sparks), one after the other from top down (had seen the same lights ca. a week earlier, but then followed by a loud falling sound like firecracker).
- 3- Ca. 1 minute later, large orange shape in the air, complete + seen clearly, ^{silent,} total disappearance.
- 4- Immediately after, a child-size human dressed in black, ran very fast (as if afraid) + rather far across the muddy field toward the houses. (Investigated here, but no signs).

LESS PRECISE

Follow up - (went to 2 firecracker stores to ask if such a light phenomenon (the orange) could be made without noise by firecracker (because sighting shortly before New Year, and heard child-like figure who ran - both denied firecracker.)

Comment - when I recognize a UFO, and there's time, usually I make the "namaste" sign (peace to you related brother, or respected teacher) in front of ^{my} heart and throat - also this time.
