

6/1/76 (cont.)

Description:

- 1 - red light flying low behind aptis, thought might be airplane - D. had earlier seen, landed in field, 2 house-people staring frightened, rushed inside (to phone with i?), i approached, it shown directly at our direction.
- 2 - it moved back over field, turned around, after sometime rose + flew off
- 3 - a 2<sup>nd</sup> red light flying low about 1/2 minute later, went behind trees near clay-pits, realized too low to be plane, went excitedly over field + path w. Nasser, a light shined from Sweden as if pointing strongly in our direction
- 4 - approached field-clay entrance + saw a whole circle of white spots directed in air + toward our way strongly, 5-6 of them as drawn, later some shown on helicopter, 1 red-(blue?) light approach from air distance + stay stationary in air pointing down at us, like in an amphitheatre (of UFOs + lights)
- 5 - ~~walk to top of hill~~ ~~in see able west things with white lights against by coast changes~~ ~~at night~~ ~~away~~; 2 red lights come bounding low over coast, near beach - (stare + go back), watch a long time - wondering at their primitive man-made type technology flying ("why don't they do something fancy + fast in the air if they're UFO's?")
- 6 - another red light come from tree-coast, very close, back + forth + red tail as if signalling, as charging red light-black cell codes continuously. i, assume it a UFO communicating, make signs to my children, it waddles a long time + flies back (mistakenly)
- 7 - i go down into field + a red light from left goes along coast then + see it's a helicopter; lights on tail doing the same, then the 2<sup>nd</sup> red from left approaching, + 3<sup>rd</sup> red from right see it's a close helicopter too, continues over the woods to left - assume all lights have been helicopters + leave disgusted at my own conservatism, freezing. total time ca. 1 hour. did not write "a helicopter account."

~~Pass. that 24 was, which 5-7 helicopters (if it all stays just helicopters)~~  
 wrote up when saw same ground-staring on 25/1/76, but on <sup>other</sup> land side of house + not think is helicopter.

4 1/2 - ~~walk~~ walk further + as if white-light object fall/fly quickly to behind bushes at left - (me surrounded in ☉), air object fly away gradually.

VERY PRECISE SEEN (6/1)  
 LESS PRECISE RECORDED (26/1)

✓ Hypothesis 1987 - In exp.s 6/1/76, 25/1/76, 27/1/76, <sup>18/8/76</sup> could be a combination of UFO phenomenon investigated by helicopters - as some flash-probes and other details do not seem to be only helicopters. But basically as mixed up, must treat exp.s as "possible info".

Note that no helicopters' red lights also showed at or white-light action stayed as such underneath them.

~~Hypothesis 2014~~
